LinkedIn: [linkedin.com/in/abrar-mayaz-53b7b2282](https://www.linkedin.com/in/abrar-mayaz-53b7b2282)

Portfolio: protfolio-seven.vercel.app

Professional Summary

Computer Science and Engineering student focused on backend and full-stack web development, software engineering, and competitive programming. Experienced in building RESTful applications using FastAPI, Django, Node.js, and Express.js, with frontend experience in ReactJS. Familiar with JWT authentication, role-based authorization, MongoDB, SQL, MySQL, PostgreSQL, Supabase, REST APIs, and database design. Experienced with Docker, Git, and GitHub. Strong foundation in data structures, algorithms, object-oriented programming, and problem solving. Currently focused on strengthening backend development and building scalable web applications.

Education

BSc in Computer Science and Engineering

Expected Graduation: 2026

International Islamic University Chittagong (IIUC)

Higher Secondary Certificate (HSC)

GPA: 5.00

Government City College, Chattogram

Passing Year: 2020

Secondary School Certificate (SSC)

GPA: 5.00

Nasirabad Government Boys High School

Passing Year: 2018

Technical Skills

Programming Languages: C, C++, Python, JavaScript

Backend Development: FastAPI, Django, Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Authorization

Frontend Development: HTML, CSS, JavaScript, ReactJS

Databases: SQL, MySQL, PostgreSQL, MongoDB, Supabase, Database Design

Core Computer Science: Data Structures, Algorithms, Object-Oriented Programming

Tools & Technologies: Git, GitHub, Docker, VS Code, Linux, VirtualBox

Projects

RoktoSetu – Blood Connect Platform

[Live Demo](#)

- Developed a full-stack blood donation and blood request management platform connecting donors, requesters, hospitals, and administrators.
- Implemented four role-based user types with JWT authentication, role-based registration, and separate dashboards for donors, hospitals, requesters, and administrators.
- Built blood request management, donor response, hospital fulfillment, blood stock management, and hospital verification workflows.
- Implemented administrator features including hospital verification, user search, and ban/unban management.
- Added search, filtering, sorting, pagination, donor availability status, password reset, profile management, and password change functionality.
- Developed RESTful backend APIs with database-driven user, request, donor, hospital, and blood stock management.
- Future work: profile picture upload and additional file uploads, implements AI features.

Frontend: [GitHub](#) **Backend:** [GitHub](#)

Job Tracker – Job Application Management System

[Live Demo](#)

- Developed a job application tracking platform that helps users organize and monitor their job search process.

- Implemented tracking for applied, rejected, and interview-stage job applications.
- Added resume upload functionality and application management features.
- Built the backend as a RESTful API and connected it with a ReactJS frontend.
- Future Work: AI implementations for resume generator, rejection based improvement suggestions

Frontend: [GitHub](#) **Backend:** [GitHub](#)

eGoru – Qurbani Cattle Marketplace

[Live Demo](#)

- Built a cattle marketplace project as a practical application of Express.js learning during Eid-ul-Adha 2026.
- Implemented backend APIs for managing cattle listings and marketplace data.
- Developed the project to practice Express.js routing, controllers, REST APIs, middleware, and CRUD operations in a real-world inspired scenario.

GitHub: [eGoru Repository](#)

Next Level Movie Explorer

[Live Demo](#)

- Developed a fully responsive movie exploration application using ReactJS as part of a frontend development bootcamp assignment.
- Implemented movie search functionality and responsive user interfaces for different screen sizes.
- Practiced React component development, API-based data handling, state management, and responsive design.

Personal Portfolio Website

[Live Demo](#)

- Developed a personal portfolio website to showcase projects, technical skills, and development experience.
- Built the interface using modern frontend technologies and deployed it using Vercel.

Raqdox – Heaven Furniture Mart

Hackathon Project

- Developed a furniture marketplace web application as part of the Raqdox hackathon project.
- Built a responsive e-commerce style interface for browsing and presenting furniture products.
- Collaborated on a time-constrained hackathon project focused on delivering a functional web application.

Live Demo: [rackdox-heaven-furniture-mart-v1.vercel.app](#)

AI-Based Job Portal

IIUC 24-Hour NextGen Hackathon 2025

- Developed a job portal platform where users can provide CVs and skills to support job-related interactions.
- Built the frontend using ReactJS and backend using Django.
- Developed the project as a team-based solution during the IIUC 24-Hour NextGen Hackathon 2025.

GitHub: github.com/Mayaz120102/hackathon-frontend

Competitive Programming

- Active competitive programmer focusing on algorithmic problem solving and data structures.
- CodeChef Rating: **1444** (2-Star).
- Codeforces Rating: **873**.
- Regular participant in online programming contests.

Training and Certifications

Professional Django Development Course

80-hour professional training under the Enhancing Digital Government and Economy (EDGE) Project, ICT Division, Government of Bangladesh.

MongoDB Skill – RAG with MongoDB

Proof of Completion for successfully completing “Building RAG Apps Using MongoDB”, awarded by MongoDB on September 17, 2026.

Racdox Hackathon – Heaven Furniture Mart

Participated in a hackathon project focused on developing the Heaven Furniture Mart web application.

CSE Fundamentals – Phitron

Completed the CSE Fundamentals program covering C, C++, Object-Oriented Programming, Data Structures and Algorithms, Competitive Programming, Python, Databases, Software Development, FastAPI, and ReactJS.

IIUC 24-Hour NextGen Hackathon 2025

Certificate of completion presented by Programming Hero and powered by Liberate Labs.

Additional Learning

- Completed the C, C++, Object-Oriented Programming, Data Structures and Algorithms, and Competitive Programming tracks through Phitron.
- Completed Software Development learning covering Python, databases, FastAPI, and ReactJS.
- Practical experience working with SQL databases including MySQL and PostgreSQL, as well as Supabase in web application projects.
- Built multiple Express.js backend practice projects while learning Node.js, Express.js, routing, controllers, middleware, REST APIs, and CRUD operations.
- Maintained an Express.js learning repository containing backend practice projects:
github.com/Mayaz120102/express_learning
- Maintained a ReactJS learning repository containing frontend practice projects and exercises.
github.com/Mayaz120102/ReactJs_learning

Activities

- Participated in the IIUC 24-Hour NextGen Hackathon 2025, presented by Programming Hero and powered by Liberate Labs.
- Participated in university programming contests.
- Attended a seminar on Integrating Machine Learning with Robotics organized by IEEE Robotics and Automation Society.

Achievements

- Secured 2nd place in two sprint race events during school athletics (2013).

Languages

- Bangla (Native)
- English (Professional Working Proficiency)
